

JAGADISH SAMUDRALA

Software Engineer | AI/ML & GenAI Builder

jagadish0828@gmail.com | +91-6305530851 | linkedin.com/in/jagadish-samudrala-48407b219 | github.com/JAGADISH3723
2026 B.Tech graduate from NIT Warangal. Open to Software Engineering & AI/ML opportunities.

SUMMARY

Self-motivated 2026 B.Tech graduate from NIT Warangal with a strong foundation in Data Structures, Algorithms, OOP, and software engineering. Experienced in full-stack development, REST APIs, databases, AI/LLM applications, RAG systems, and data analysis. Focused on building scalable software systems and AI-powered products.

TECHNICAL SKILLS

Programming: Python, C++, C#, JavaScript, Java

AI / ML & Data: LangChain, FAISS, OpenAI API, RAG, NumPy, Pandas

Web Development: React.js, Node.js, Express.js, HTML5, CSS3, .NET

Databases: MongoDB, MySQL, PostgreSQL, SQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Developer Tools: Git, Linux, Postman, Render, VS Code, Agile/Scrum

FEATURED PROJECTS

Real-Time Idea Sharing Platform - Full-Stack Web Application

End-to-end platform for sharing ideas and interacting through nested discussion threads.

- Architected a responsive interface using 15+ modular reusable UI components.
- Managed complex application state with Context API across multi-layered views and nested comment threads.
- Implemented authentication, authorization, route protection, form validation, and REST API integration.
- Followed Git-based Agile development practices.

Tech: React.js, TypeScript, Context API, Node.js, Express.js, MongoDB, Git, Agile

Custom LLM-Powered QA Bot - AI/GenAI/RAG

AI-powered document question-answering system that retrieves relevant context before generating responses.

- Engineered a document-based QA pipeline using Python and LangChain.
- Implemented semantic search using FAISS and OpenAI embeddings.
- Designed retrieval workflows to improve context extraction from dense documents.
- Debugged retrieval timeouts and evaluated responses across different user intents.

Tech: Python, LangChain, GPT-4, FAISS, OpenAI API, RAG

Zepto E-commerce Inventory Data Analysis - Data Analytics

Analytical project focused on extracting insights from e-commerce inventory data.

- Analyzed 10K+ inventory rows using SQL queries.
- Used Python and Pandas to clean and structure data.
- Developed weight-based segmentation and pricing metrics.
- Extracted buying and inventory trends for analytical decision-making.

Tech: SQL, PostgreSQL, Python, Pandas

PROBLEM SOLVING

Solved 400+ algorithmic problems across LeetCode, CodeChef, Codeforces, and other coding platforms. Skilled at breaking complex problems into smaller components, reasoning about constraints, optimizing solutions, and debugging under time pressure.

ACHIEVEMENTS

- 400+ algorithmic problems solved across competitive programming platforms.
- JEE Main: 96 percentile nationwide.

EDUCATION

National Institute of Technology, Warangal - B.Tech, Batch of 2026 (Apr 2024 - 2026)

Sai Shivani Junior College - State Board of Intermediate Education (2019 - 2021)

LEADERSHIP

- Captain, Inter-NIT Kabaddi Team, NIT Warangal
- Executive Member, Film Club, NIT Warangal
